PROJECT PRESENTATION EVALUATION FORM

Student	Max Henry

Criterion	Max	Score
Statement of Problem	15	15
Approach	20	15
Background and Related Work in Field	15	10
Results	15	15
Discussion and Analysis of Results	20	20
Relevant Future Work	5	5
Clarity in Presentation	10	8
Total	100	88

Comments Hyp: k-nn > linear + ridge regression ?

Statement of Problem and Approach

Predict player impact - goals
K-nn regression
Data → public / qualitative
36 features scraped production
Regression combiner → But
Tuning (slide 10) → 10 cv how?

Background and Related Work in Field

Soccer → Motivation
K-nn
Metrics
Citations in [#]? → Not appropriate. Give names.

Results

Tuning results.
→ Sig determined how?
Contrast ratio after selection?
Slide 13 - degrees at 16.
14
degrees → to predict regular?

Discussion and Analysis of Results

A lot of discussion w/ results
Feature selection unclear →

Relevant Future Work

Feature selection
Recently by features
Weighted contribs
MAECS/LOESS

Clarity in Presentation

EP Slides (20)
Organization confusing
Missing details

Gic
Piers
Morgan

30 sec remaining

Radius-nn
Parzen window

Feature selection? Yes

Backward?

x?
x-axis?
